Training is delivered by TAFE NSW

This Traineeship is designed for people wishing to pursue a career in electrotechnology. Learners will develop skills to install and carry out basic routine maintenance on either antennas, automotive accessories, office equipment, refrigeration and air conditioning equipment, domestic appliances, standard communications equipment, computers, fire alarms, renewable energy or security installations.

Depending on the units chosen, students will:
- acquire basic skills and knowledge of electrical principles that relate to the Electrotechnology industry
- develop skills and knowledge to carry out routine work activities in an Electrotechnology environment
- learn to identify and select components/accessories/materials for Electrotechnology work activities
- develop skills and knowledge to use routine equipment/plant/technologies in an Electrotechnology environment

Outcome
- Certificate II in Electrotechnology Servicing qualification.
- Articulation into an Apprenticeship in Certificate III Electrotechnology (Systems Electrician).
- A career path into the Electrotechnology industry.
- Advanced standing into Certificate III Electrotechnology (Systems Electrician).

Course delivery
- Both on the job and off the job and can be delivered face-to-face, flexibly or mixed mode

Commitment + Off the Job Delivery
- You will be required to undertake a minimum of 100 days in paid employment over the period of the School-Based Traineeship. Work can be undertaken during school time, after school and during school holidays.

How will students be assessed?
- Assessment will be both on-the-job and off-the-job through written tests, project work & practical exercises.

Unit value
- Total of 5 units over two years towards your HSC

Eligible for UAI?
- No
