INTervention SUPPORT PROGRAM

Guide to completing the Parent/Carer Certification form

Intervention Support Program

The Intervention Support Program provides funding to organisations to help children with disabilities in early childhood intervention services, child care centres, residential care and government and Catholic schools.

The Intervention Support Program provides the following type of funding:

- **Young Children with Disabilities** funding helps children with disabilities aged 0 to 6 years.
- **Children in Residential Care** funding helps children with disabilities in full time residential care facilities aged 0 to 18 years.
- **Non-School Organisations** funding helps children with severe disabilities aged 4 to 18 years.

Parent/Carer Certification Form

Parents should complete the form with staff each year. This allows the organisation to get government funding to help your child. By signing the form you are giving the organisation permission to give your child’s details to the Intervention Support Program. All organisations applying for funding must keep a completed form for your child.

What does the Intervention Support Program do with my child’s details?

It uses the details to calculate funding. It does not give the details to anyone else unless you give it permission to do so.
