How schools manage the safety and security of its students and staff.

Our schools are among the safest places in our community for children and young people. However, from time to time, incidents do affect schools just as they affect communities and society as a whole.

Following such an incident, the principal notifies the Department’s School Safety and Response Hotline so support and advice can be provided to assist the school with the management of the incident. If the principal believes the incident may involve a criminal offence they are required to also notify the NSW Police.

The School Safety and Response Unit Hotline is available to assist principals 24 hours a day, seven days a week. Senior police and education officers in the unit can provide immediate support and advice on the management of any school-related incident involving violence, weapons, illegal drugs or other criminal activity.

Through the NSW Department of Education and Communities’ commitment to improving transparency and ease of access to information, the reports are being made available to the public. In doing so, the Department is committed to the welfare of students and staff in NSW public schools. As such, references have been removed which could expose a person to a risk of harm or which reveals the identities, or the personal/health information of students, school staff and community members. Information that may prejudice an investigation has also been removed.

The reports are released with a one term delay. Publishing these reports informs the community about significant incidents in public schools and how the Department supports schools through incidents while still protecting students and staff.

The vast majority of schools, more than 90 per cent, did not need to report a single incident in Term 4, 2012. Less than eight per cent of schools reported only one incident.
